

Permitting and Regulatory Compliance

Sackheim Consulting recruits and directs multi-disciplinary teams with the collaboration of:

- Area West Environmental

Project management with particular expertise in wetland and biological resource issues;

- Christy Anderson Graphic Design Services

Graphic presentations, including photosimulations, to facilitate an understanding of project effects;

More than twenty other independent contractors and staff from larger consulting firms address highly technical issues including modeling of air quality, noise, and electric and magnetic field (EMF) impacts. They also provide cost-effective field teams for biological and cultural resource surveys, and administrative support for quality document production and distribution on accelerated schedules.
