

Dr. Maria Montessori's words capture the essence of what makes Montessori schools so different and so successful. The foundation of Montessori education is its respect for the hidden potential of children to teach themselves how to think, how to learn and how to interact as members of a community. Now and throughout their lives. Providing an environment where these hidden powers can be harnessed is what we're all about at Trinity Montessori. Our goal is to help children realize their full potential as peaceful world citizens with a lifelong yearning for knowledge. Our influence extends beyond the classroom to families, neighborhoods and the broader community.

A Tradition of excellence

Trinity Montessori School, Inc. has been providing an unmatched level of excellence in education in a caring and nurturing environment since 1967. We are associated with the American Montessori Society, Rochester Montessori Association, and hold an Absolute Charter from the New York State Board of Regents. Our programs serve toddlers ages 2 to 3, primary students ages 3 to 6 and early elementary students ages 6 to 10. Nearly 1,000 students from the Greater Rochester area have benefitted from the strong foundation that the school has provided.

A better way To Teach

Classes are ungraded. Mixed age groupings at each level allow your child to work at his or her own pace toward the fulfillment of his/her highest potential. Teachers here are really directors. Keen observers of the individual interests and needs of each child. Recognizing periods of readiness. And offering encouragement on the road to success. Children learn by manipulating scientifically-designed materials which open the door to discovery. Their absorption in meaningful work develops both self-discipline and maturity. The Montessori child becomes an independent, creative thinker with a lifelong love of learning.

A more individual approach

Because every child learns differently, every child deserves a different learning experience. And at Trinity Montessori every child gets one. We carefully consider each application based on a child's individual talents and learning style. Our goal is to help your family find the best match between student and program.

Because learning doesn't end when your child leaves the school, we feel it parental involvement is critical. Because the Montessori method of education shows progressively greater results over

time, is our hope that every child will complete a sequential cycle of at least three or more years in the program.

An experience for life

Clearly, a Trinity Montessori education is a powerful tool to drive a child's future success. But don't just take our word for it:

"The staff at Trinity Montessori provided my son with an environment of love and acceptance. The students naturally model this positive attitude and encourage each other as they confidently meet their challenges."

Meg & Rich Smerbeck, parents

"From as early as I can remember, my brothers and I loved learning new things. I can't help but believe that the foundation we all received at Trinity Montessori has helped each of us succeed in everything we've done."

Jennifer Fox, former student

"We've been amazed at what Trinity Montessori teachers have done with our daughter, who is extremely bright, but can be unfocused. The foundation they built over the last two years resulted in growth in her reading skills this year that is nothing short of explosive."

Doug & Michele Potter, parents
