**NOTES & EXPLANATIONS:**

(1) Do not use this or any data from a limited number of demonstration trials as a significant factor in product selection.

Testing accuracy, area variations and a limited environmental base can give misleading results.

(2) Pioneer income per acre is calculated based on the following values:

Default	\$7.75/bushel price
Low Lin	\$7.75/bushel price

\*\*\* Since the trait/segment information is derived from each competitor's own product information, Pioneer can make no warranty as to its accuracy.

Segments:

RR - Varieties with the Roundup Ready® gene (RR) are resistant to labeled glyphosate herbicides. This technology allows for post-emergent applications of glyphosate herbicide without crop injury or stress (see herbicide labels). Labeled glyphosate

herbicides should only be used over the top of those varieties that carry the Roundup Ready gene designation. NOTE: A soybean variety with a herbicide resistance trait does not confer resistance to all herbicides. Spraying herbicides not labeled for a specific soybean variety will result in severe plant injury or plant death. Always read and follow herbicide label directions.
